PROFILE SUMMARY

Passionate Cyber Security Science undergraduate with practical experience in secure web application development, cybersecurity awareness initiatives, and technical documentation. Proven ability to build secure, user-focused web solutions by applying authentication, input validation, and other security best practices. A quick learner with strong problem-solving and teamwork skills, seeking an internship opportunity to contribute to cybersecurity and software development projects while expanding technical expertise.

SKILLS

- Web Development (HTML, CSS, PHP, JavaScript)
- Git & GitHub
- Web Application Security
- Authentication & Access Control
- Technical Documentation and Microsoft Office Suite
- Team collaboration
- Technical documentation
- Interpersonal Skills: Results-driven, technical problem-solving, collaboration, and strong verbal/written communication
- Leadership Skills

PROFESSIONAL EXPERIENCE

Cybersecurity & Web Development Project Contributor – Cyber Threat Awareness Web Application,
March 2025

Ladoke Akintola University of Technology (LAUTECH), Ogbomoso, Nigeria

- Collaborate in a student led team to build a web based platform for educating users about common cyber threats.
- Contribute to project documentation, including system design, development work flow, and user experience guide.
- Assist in the research and drafting of educational content for cyber security awareness modules.
- Gain practical experience in team work, documentation, and cyber threat fundamentals.

EDUCATION

Ladoke Akintola University of Technology, Ogbomoso, Oyo State

B.Sc. Cyber Security Science (Ongoing)

March 2023 – Present

EXTRA CURRICULAR & ACADEMIC ACTIVITIES

HTML & CSS Crash Course

FreeCodeCamp

March 2025

Introduction to Cybersecurity

Udemy

December 2024

PROJECTS

Church Management System

Ongoing

- Developing a full-featured Church Management System to streamline member records, events, donations, and administrative tasks with secure data handling.

Real Estate Management Website

Ongoing (Team Project)

- Collaborating on a comprehensive Real Estate platform for managing land, housing, and property listings with secure user authentication, database integration, and admin functionalities.

Decentralised File Storage System: Departmental Project

June 2025 – July 2025

- Contributed as a team member to design and document a decentralized system for secure file storage.
- Implemented basic encryption algorithm to ensure confidentiality during file upload and retrieval.
- Learned core principles of decentralized architecture and file security.
- Technologies used include HTML, CSS, JavaScript, PHP, MySQL

Ogbomoso Grammar School Website with Secure Admin Panel

(Current Project)

- Developed a comprehensive website for Ogbomoso Grammar School featuring a secure admin panel for efficient school management, content updates, and user administration.
- Implemented top-tier security features including input validation, authentication mechanisms, encryption protocols, and protection against common web vulnerabilities such as SQL injection, XSS, and CSRF to ensure robust defense against cyber attacks.
- Enhanced user experience with responsive design and integrated features for school announcements, student records, and administrative efficiency.
- Technologies used include HTML • CSS • JavaScript • PHP • MySQL • Git
